EDUCATION

Bachelor of Science in Digital Arts and Sciences - University of Florida
Herbert Wertheim College of Engineering

May 2022
GPA: 3.63/4.00

WORK EXPERIENCE

Web Developer Intern

Jun. 2021 – Jul. 2021

Uppley Digital – remote

- Designed client websites using CMS platform WordPress, along with Elementor organizing data and improving user experience and fixing client websites with JavaScript, HTML and CSS (Sass)
- Designed the company website using Webflow, adding styles and customizing the existing template.
- Participated in client meetings to set project expectations and deliver products in the expected timeline.

Front-End Development Intern

Sep. 2020 – Oct 2020

Kamel – remote

- Developed and improved features of Kamel Product, a platform to contact and ease the communication of small and local businesses with their customers in Peru.
- Collaborated with other team members in debugging and fixing issues on the website with ReactJS.
- Attended weekly meetings with teammates and the project manager to keep track of progress.

Software Engineering Intern

Jul. 2020 – Aug. 2020

American Express – remote

- Developed a browser extension to show a list of modules in specific American Express pages that work with the One App framework using React, tool that would help current Software Developers debug and improve efficiency.
- Collaborated with other software engineers and interns to meet project specifications.
- Attended daily standups to keep track of progress and followed the Agile methodology.

Shadowing Program Intern

Jan. 2020 – Apr. 2020

InfoTech – Gainesville, Florida

- Developed a portfolio website for an interior design business using vanilla JavaScript, HTML and CSS.
- Applied fundamental UX and UI principles learned from a professional UX/UI designer at InfoTech, as well as front-end development languages to make applications responsive and user focused.
- Attended weekly meetings with mentor to keep track of progress and get guidance.
